

Alfredo Artiles, Arizona State University

My interdisciplinary scholarship examines the ways cultural practices and ideologies of *difference* mediate school responses to students' abilities and needs. My research also focuses on teacher learning for social justice and how special education placement practices as a window into schools' cultural constructions of difference. A related strand examines how teachers learn to use a social justice perspective as they teach diverse students.

KU Department of Special Education  
invites you to attend the  
Edward L. Meyen Distinguished Lecture
