Institute for Education Sciences' CFDA 84.324X: Research to Accelerate Pandemic Recovery in Special Education: Project ENGAGE: Enhancing Student Engagement to Facilitate Learning and Well-Being. 2021-2025.

Role: Principal Investigator

Role in Preparation: Co-Author

There is urgent need to aid in what will be an ongoing educational recovery in the wake of the pandemic. This includes not only losses in instructional time but also students' exposure to tremendous stress and trauma (Minkos & Gelbar, 2020), with likely impact on academic achievement and social and emotional well-being. Schools are in immediate need of actionable and focused research-based strategies associated with consequential outcomes to encourage students' academic, behavior, and social development and a sense of self-agency and self-determination. One particularly vulnerable population is students with elevated internalizing behavior patterns, or students with and at-risk for emotional or behavior disorders (EBD). Given the educational complexities and personal trauma experienced in the pandemic era, many students are expected to exhibit elevated levels of internalizing issues (e.g., anxiety), which may impede learning as teachers strive to maximize student engagement to facilitate learning and well-being (NASP, 2020; Perfect et al., 2016). The solution – we need to (a) determine how internalizing behavior patterns (and other student performance patterns) have shifted since the pandemic and (b) empower teachers with practical, effective Tier 2 strategies they can integrate into academic instruction to help students manage anxious feelings, enhance engagement, and facilitate learning and well-being. We offer Project Engage as the solution. Aim 1 Examines the Pandemic Impact: Quantify the Gap. Aim 2 Test a Tier 2 Intervention – Recognize. Relax. Record. to Decrease Internalizing Behaviors and Maximize Engagement.

Researchers at the University of Kansas (KU), in partnership with the Maryland Coalition for Inclusive Education (MCIE), with support from the Institute for Measurement, Methodology,

Analysis and Policy (IMMAP) at Texas Tech University and the National Implementation Research Network (NIRN) at the University of North Carolina at Chapel Hill, propose to conduct a Goal 3 Replication Study to meet the stated purpose of the IES Special Education Research Program on Transition Outcomes for Secondary Students with Disabilities to support “research that contributes to the identification of effective strategies and knowledge and skills necessary for teachers and other instructional personnel to improve transition outcomes of secondary students with disabilities.” Specifically, this resubmitted proposal will address an area of critical need and importance in transition and secondary education: the identification of the most effective implementation supports for teachers using the *Self-Determined Learning Model of Instruction* (SDLMI) to enhance teacher and student outcomes.

Empowering Teachers with Low Intensity Strategies to Support Instruction II (2015-2019) (\$394,610; CFDA Number: R324B150004; Institute of Education Sciences Research Training Program in Special Education: Early Career Development and Mentoring)

Role: Mentor

Role in Preparation: Co-Author - Mentor

Purpose: Principal Investigator (PI) Ennis will further develop skills conducting school-based research focused on improving outcomes for students in grades K-3 with and at-risk for emotional disturbance (ED). The research goals are to bridge the research-to-practice gap to empower teachers to use low intensity supports (i.e., opportunities to respond, instructional choice) in the classroom with limited university support to improve behavioral and academic outcomes for student with ED. The four-year project, supported by mentors with expertise in the field of school-based research (Kathleen Lane and James Ernest) will utilize both single case research design methodology and a small-scale randomized control trial.

Implementing Comprehensive, Integrated, Three-tiered Models to Meet Students' Academic, Behavior, and Social Needs: A Researcher-Practitioner Partnership (2015-2017) (CFDA Number: 84.305H; Researcher-Practitioner Partnerships in Education Research; New or Existing Partnership)

Role: Principal Investigator

Role in Preparation: Author

Purpose In this application we plan to develop a partnership between Lawrence Public Schools (LPS) and the Comprehensive, Integrated, Three-tiered (CI3T) Prevention Research Project at the University of Kansas in collaboration with Arizona State University. We will conduct 4 carefully constructed studies to examine newly installed district- and school-level system changes for creating positive learning environments and increasing academic achievement for all students – including those with EBD. The Partnership will support (a) installation and evaluation of initial implementation of site-level CI3T models and (b)

construction of processes by which this partnership will continue after this grant funding concludes.

Building Capacity for Functional Assessment-Based Intervention's (FABI) in Kansas: Moving Forward (2015-2016) (\$67,000)

Role: Principal Investigator

Role in Preparation: Author

The purpose of this project is to collaborate with Technical Assistance Systems Network, Autism Tertiary Behavior Supports (TASN ATBS) providers move forward with TASN ATBS's goals of continuing to introduce and support a systematic approach to the design, design, implementation, and evaluation of functional assessment-based interventions (FABI) across Kansas.

Designing Comprehensive, Integrated, Three-Tiered Models (CI3T) of Prevention in Kansas: Building Multi-tiered Systems Support with an Integrated Focus (2014-2015) (\$250, 920).

Role: Principal Investigator

Role in Preparation: Author

In this project Dr. Kathleen Lane, Dr. Wendy Oakes, Project Manager, and KU Graduate Assistants will, in collaboration with Technical Assistance System Network (TASN) providers, move forward with the goal of addressing academic, behavioral, and social domains in tandem through a Comprehensive, Integrated Three-tiered (CI3T) model of prevention. As part of this integrated approach, screening and assessment systems will be put in place to support early detection efforts across the pre-K through 12 grade continuum as well as accurate assessment of student performance over time. Schools will create systems for proactively responding to identified students' needs. Lane and Oakes will support the 24 schools (5 from Abilene, 5 from Morris County, and 14 from Lawrence) who developed MTSS: CI3T plans to implement the plans during the 2014-2015 and 2015-2016 academic years. Lane and Oakes will be responsible for securing university and district-level approvals prior to beginning implementation activities.

Designing Comprehensive, Integrated, Three-Tiered Models (CI3T) of Prevention in Kansas: Building Multi-tiered Systems Support with an Integrated Focus (MTSS: CI3T II Training Project) (2014-2015) (\$157, 190)

Role: Principal Investigator

Role in Preparation: Author

The purpose of this project this project is to move forward with the goal of addressing academic, behavioral, and social domains in tandem through a Comprehensive, Integrated Three-tiered (CI3T) model of prevention. As part of this integrated approach, screening and assessment systems will be put in place to support early detection efforts across the pre-K through 12 grade continuum as well as accurate assessment of student performance over time. Schools will create systems for proactively responding to identified students' needs. Lane and Oakes will work with State-Identified Trainers to facilitate training activities during the 2014-2015 (year 1) academic year. Cohort III will be co-lead by Lane and Oakes in conjunction with 4 MTSS: CI3T Trainers (nominated by Crystal Davis). These same 4 MTSS: CI3T trainers will lead Cohort IV, with onsite and/or remote support from Lane and Oakes (GRAs will not be involved with Cohort IV). Cohorts III and IV will each contain up to 12 school-site teams to build MTSS: CI3T plans for

implementation in subsequent years (support by Lane and Oakes through future contracts or exclusively TASN support).

Building Capacity for Functional Assessment-Based Intervention's (FABI) in Kansas: A Professional Development Training Series (2014-2015) (\$103,481)

Role: Principal Investigator

Role in Preparation: Author

The purpose of this project is to introduce a systematic approach to the design, implementation, and evaluation of functional assessment-based interventions (FABI) across Kansas. As part of this training process, school-site teams and coaches will learn this systematic approach with a goal of creating a sustainable model to support students with Tier 3 needs focused on developing local capacity with (a) school-site teams and (b) district-level coaches.

Designing Comprehensive, Integrated, Three-Tiered Models (CI3T) of Prevention in Kansas: Building Multi-tiered Systems Support with an Integrated Focus. (2013-2014). Contract with Keystone Learning Services (\$155,198).

Role: Principal Investigator

Role in Preparation: Author

The purpose of this project, *Designing Comprehensive, Integrated, Three-Tiered Models (CI3T) of Prevention in Kansas: Building Multi-tiered Systems Support with an Integrated Focus*, is to support schools in Kansas to develop Multi-tiered Systems of Support that address students' academic, behavioral, and social needs. This project is made possible through a contract with Keystone Learning. As part of the scope of this contract awarded to University of Kansas, PI Lane and Consultant Wendy Oakes from Arizona State University (we received IRB approval through ASU following approval from KU), will work with teams from 30 schools (up to 15 in Cohort I and up to 15 in Cohort 2) to participate in two training series (one per Cohort). Specifically, we will invite 7-8 people (including the parent member) from each participating school to attend a six day training series (3 full day sessions and 3 2-hour sessions) during which time they will use information from their faculty and staff to design a CI3T model of prevention that could be implemented at their school site the following academic year. Only the team members will attend the training series (full faculty and staff will not attend).

Identifying and supporting K-12 students within the context of three-tiered models of prevention to meet students' multiple needs: A collaborative effort. (2013-2014). Graduate Research Fund Competition/ School of Education Research Support. (25,961)

Role: Principal Investigator

Role in Preparation: Author

Project Empower, is designed to address two objectives. The first objective is to introduce behavior screening tools to Kansas public school systems currently implementing Multi-tiered Systems of Support (MTSS) by conducting a series of validation studies. The second objective is to provide a coordinated professional development series offered to all pre-kindergarten through twelfth-grade teachers in Eudora, Lawrence, and Topeka public schools interested in learning more about systematic screening tools and how to use screening data to inform Tier 2 and Tier 3 intervention efforts. As part of this objective, we will offer five 2-hour, stand-alone sessions held after school by PI Lane to enhance the tiered systems currently in place in local school systems.

Institute for Education Sciences' CFDA 84.324X: Research to Accelerate Pandemic Recovery in Special Education: **Ci3T FITness** – Structured Flexibility to Improve Integrated Tiered Systems Technologies in Secondary Schools.

Role: Co-Principal Investigator

Role in Preparation: Co-Author

School districts are facing the urgent challenge of supporting increased needs of students with and at-risk for disabilities and students of color who have been disproportionately disadvantaged by the COVID-19 pandemic. National Association of School Psychologists (2020) predicted the percentage of school-age youth with internalizing and externalizing behaviors to increase dramatically, which is concerning given associated outcomes for these students: school failure, retention, dropout, strained relationships, and increased mental health needs. By 7th grade, 40% of students have experienced anxiety or depression, with 13-20% of school-age youth meeting mental health disorder criteria annually (CDC, 2013). Thus, enhancing integrated instruction for students with EBD may alleviate differential outcomes which expanded during the pandemic. Our immediate challenge: increase educators' capacity to proactively address academic, behavior, and social-emotional wellbeing needs of middle and high school students with and at-risk for disabilities. Our response to this district-identified need is Project Ci3T FITness – Structured Flexibility to Improve Integrated Tiered Systems Technologies in Secondary Schools. Middle and high school leaders value meeting students' academic, behavioral, and social needs by adopting tiered systems such as Comprehensive, Integrated, Three-tiered (Ci3T) models of prevention—a systems approach to addressing students' multiple needs in one model. Ci3T is data-driven, with structures for monitoring system- and student-level data, tracking school and district goal progress, and informing instruction for students—including those with and at risk for disabilities. Project Ci3T FITness proposes two key aims to build on lessons learned from Project ENHANCE (IES-funded; at the elementary level). Aim 1 Examine the Pandemic Impact: Quantify the Gap. Aim 2 Adapt and Test *Ci3T FITness Implementation Series and Delivery* at the Middle and High School Levels
